Subject: Heads Up - Los Alamos

Jim,

Today I signed the determination that stormwater discharges from municipal separate storm sewers (MS4s) located in the Los Alamos Urban Cluster and on LANL property are contributing to violations of New Mexico water quality standards. EPA is designating MS4s located in the portion of Los Alamos County, New Mexico within the Los Alamos Urban Cluster, and MS4s located on Los Alamos National Laboratory (LANL) property located within Los Alamos County and Santa Fe County, New Mexico as small MS4s requiring NPDES permit coverage. Operators of MS4s within the Los Alamos Urban Cluster and on LANL property will be required to obtain NPDES permits.

Ken
